Methodist University Environmental Policy

The Board of Trustees and President of Methodist University have adopted the following Environmental Policy:

Consistent with the mission of Methodist University, it is the policy of Methodist University to operate as a responsible corporate citizen committed to sound environmental management.

In pursuit of this policy Methodist University will strive to:

- Promote the use of safe technologies and operation practices to minimize our impact on the environment
- Operate in an environmentally responsible manner and in compliance with all environmental laws and regulations
- Implement an effective Pollution Prevention Program, to minimize waste generation, promote recycling and conserve resources
- Respond immediately to emergencies to minimize adverse impacts
- Monitor operations through audits and other means to help assure that practices in all Methodist University workplaces conform to our policies

It is incumbent upon all Methodist University personnel, associates and contractors to assess their roles and responsibilities and fulfill the obligations set forth in this environmental management policy.

Ben Hancock
President
