Severe Weather Awareness

Severe Weather Preparedness Week March 3-9, 2019

Make sure you are prepared no matter where you are or the type of severe weather you may encounter.

<https://www.ready.gov/severe-weather>

MUPAWS (Methodist University Public Alert Warning System)

Have you registered with MUPAWS? Do you have the app setup on your smart phone? The Alertus+ app is just one of the avenues that are available for you to be notified of an emergency situation here on campus. The app can also be used by you to report an emergency/incident/crime or to notify Public Safety if you need assistance.

Tornado Safety Awareness

Do you know the difference between a watch and a warning? People often confuse the two. A **Tornado Watch** means a tornado is **possible**. A **Tornado Warning** means a tornado is already **occurring or will occur** soon. Do you know where to go or what you should do if there is a tornado warning while you are here on campus? Additional resources:

<http://www.methodist.edu/emergency>.

This year **Methodist University will be once again be participating in the Statewide Tornado Drill** which will take place on **Wednesday March 6, 2019 @ 9:30 am**. Please participate with us if you are on campus. Additional resources: <http://www.weather.gov/rah/2019swpw>
