ADDENDUM

The following course descriptions were excluded from the list of courses for the Doctor of Physical Therapy Program (pages 122-130):

DPT 6000 MUSCULOSKELETAL PHYSICAL THERAPY I **5 s.h.**

This course provides an in-depth study of the evaluation, diagnosis, and physical management of musculoskeletal dysfunction of the cervical spine, thoracic spine, and upper extremities of the human body. Students will learn to integrate concepts of various approaches to physical therapy management with specific examination and intervention techniques to address both surgical and non-surgical musculoskeletal conditions of these regions. Various orthopedic manual physical therapy approaches, including thrust and non-thrust techniques, are introduced. The student will also learn to design appropriate therapeutic exercises for various musculoskeletal conditions of these upper quarter regions.

DPT 6020 MUSCULOSKELETAL PHYSICAL THERAPY II **5 s. h.**

This course provides an in-depth study of the evaluation, diagnosis, and physical management of musculoskeletal dysfunction of the lumbar spine, pelvis, and lower extremities of the human body. Students will learn to integrate concepts of various approaches to physical therapy management with specific examination and intervention techniques to address both surgical and non-surgical musculoskeletal conditions of these regions. Various orthopedic manual physical therapy approaches, including thrust and non-thrust techniques, are introduced. The student will also learn to design appropriate therapeutic exercises for various musculoskeletal conditions of these lower quarter regions.
